CHALLENGE

Traditional scheduling approach causes uneven flow

- Oftentimes, > 50% of appointments are scheduled inaccurately.
- Visit durations are not based on data of actual time needed.
- Individual schedulers enter their own interpretation of visit reason.
- Uneven flow is a major cause of long patient waits, lost productivity, and higher staffing costs.

SOLUTION

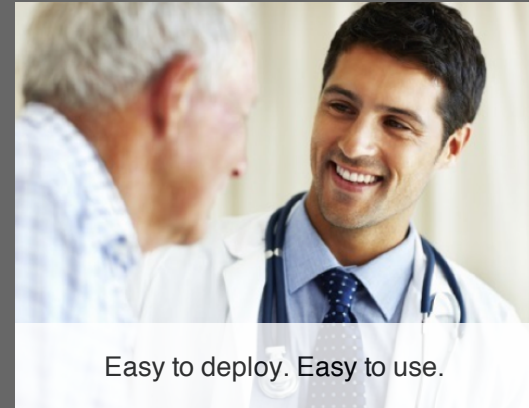

Intelligent scheduling advice that optimizes provider schedules and daily throughput

- Service guides scheduler through right questions to ask patient.
- Based on actual visit data, system recommends:
 - Accurate visit duration.
 - Consistent visit reason.

Use reliable visit duration and reason to:

- Improve daily throughput.
- Enhance care team's planning and anticipation of patient needs.
- Predict when you're likely to run behind, or can add another visit.
- Increase care team confidence in schedule, and successfully transition to more cost-effective call centers and online scheduling.

Easy to deploy. Easy to use.

FEATURES

- Service maintains "right" questions
- Business rules are easily updated
- Flexible; can tailor for individual providers
- Integration with scheduling system

RESULTS

More dependable schedule and consistent flow

Better:

- Reliable accurate scheduling
- Smoother stress-free flow for care team
- Less patient wait time, higher satisfaction

Faster:

- Staff fully trained in < 30 minutes
- > 300% ROI within months

More Cost-effective:

- Increase throughput
- Save staff time
- Reduce staff costs
