## CHALLENGE

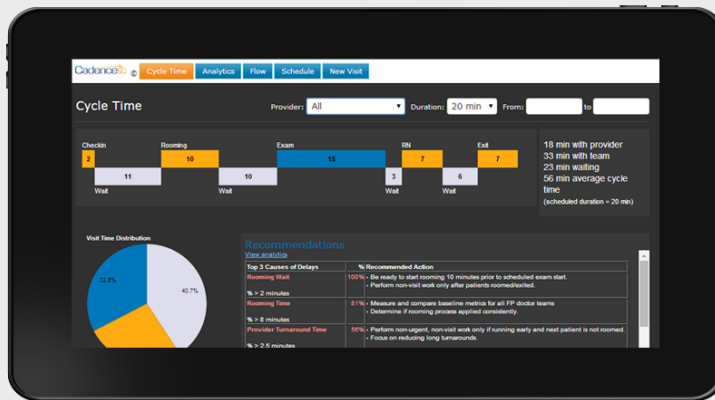

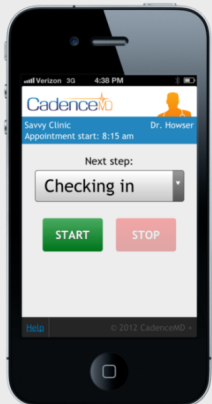

Clinics struggle to understand the underlying causes of patient flow inefficiency

- Most practice management systems don't adequately track patient flow.
- It's challenging to extrapolate accurate data and provide timely reports.
- Manual tracking is time consuming, inconsistent, and-not scalable.

## SOLUTION

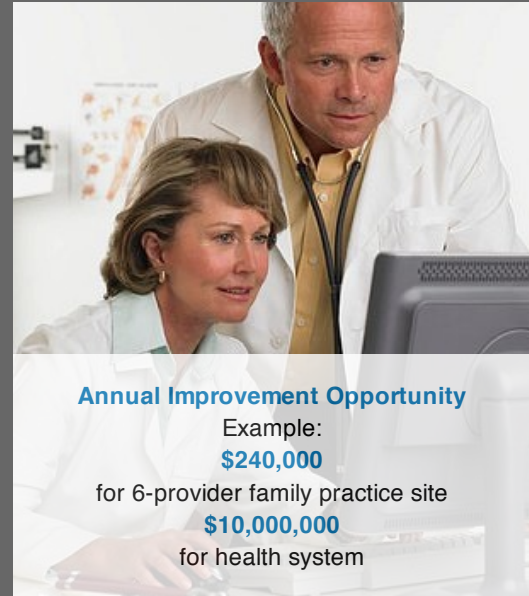

The simplest tool on the market to assess patient flow, and pinpoint the root causes of inefficiencies

- Simple automated data collection tool captures granular visit data.
- Data is automatically converted into actionable insight.
  - Understand time spent in each step.
  - Quantify patient waits throughout visit process.

Use insights and analytics to:

- Determine if you are scheduling the right visit duration.
- Understand the root causes of delays and patient waits.
- Correlate patient satisfaction and visit experience.
- Compare practices and reduce variation.
- Quantify improvement savings.

### Annual Improvement Opportunity

Example:  
**\$240,000**

for 6-provider family practice site

**\$10,000,000**

for health system

## FEATURES

- Highly configurable for any flow
- Business rules ensure accurate analytics
- Point of service patient feedback
- Provider and site comparisons

## RESULTS

Faster, more accurate assessment of patient flow

### Better:

- Most granular process data
- Intuitive graphic presentations
- Clarity on root causes of inefficiencies

### Faster:

- < 60 minutes to deploy
- Immediate patient feedback
- Near real time flow assessment

### More Cost-effective:

- Save time, reduce cost of data collection, analysis and reporting
